General Description

A highly motivated post-doctoral research fellow is sought to investigate the social-emotional development of secondary school students in an urban STEM educational program, and student, teacher, and school factors that affect student social-emotional development. The applicant should hold a Ph.D. (or have a scheduled dissertation date in spring 2016) in sociology, developmental psychology, or education, with research experience and interests relating to k-12 education and qualitative methods.

The main duties of the position are as follows:

- Assist with development of qualitative research designs and interview and observational protocols;
- Collect data from participants including students, teachers, and school administrators;
- Analyze qualitative data related to a variety of ongoing research projects;
- Participate with a research team in writing manuscripts and grant proposals.

Other Duties

- Interact with students, teachers, and school administrators;
- Support reporting on funded activities and compliance with permissions to conduct research with human subjects

Qualifications

- Intellectual strength in the field of education
- Focus on adolescent social-emotional development
- Training and experience in qualitative methods

- Ability to handle multiple assignments
- Ability to work independently and as part of a team
- Proficient oral and writing skills
